PROFESSIONAL SUMMARY

Recent Computer Science graduate with hands-on experience as a Software Developer Intern and a strong foundation in software, web, and artificial intelligence development. Experienced in developing web applications and training natural language processing models for AI-driven projects.

SKILLS

C, Java, C#, Python**,** ASP.NET Core MVC, Next.js, React**,** HTML, CSS**,** NLP**,** GitHub, Visual Studio Code, Android Studio, Visual Studio, Figma, Canva, Adaptability and Continuous Learning, Attention to Detail, Written and Verbal Communication,

INTERNSHIP

Software Developer Intern (OJT) September 02, 2025 – November 12, 2025
Right Apps Incorporated San Nicolas Proper, Cebu City, Cebu, Philippines, 6000
Technologies: Next.js, TypeScript, JavaScript, CSS, Git

- Developed and maintained frontend features for a Point-of-Sale (POS) Management System using Next.js.
- Designed the Stores page prototype in Figma and translated the design into a functional frontend interface.
- Collaborated with the manager and fellow intern during feature development and system improvements.

PROJECTS

EchoMind – Mental Health Consultant Web Application using BERT
Role: AI Developer / Frontend Developer
Technologies: React, Python, BERT, PyTorch, Pandas, Scikit-learn

- Trained and fine-tuned a BERT model for anxiety classification using a custom dataset.
- Contributed significantly to frontend development, implementing user interface components and core system functionalities.
- Presented and showcased the project during the University of Cebu's 3rd AI Innovation Lab.

SmartBash – An AI-Based Real-Time Monitoring for Barangay-Level Disaster Management
Role: AI & Frontend Developer, Backend Contributor
Technologies: Next.js, CSS, XLM-RoBERTa, Python, PyTorch, Pandas, NumPy, Scikit-learn, CLIP

- Trained and fine-tuned an XLM-RoBERTa model for text classification to support intelligent system features.
- Performed data preprocessing, dataset handling, and model evaluation.
- Migrated the frontend codebase from JavaScript to TypeScript to improve type safety, scalability, and maintainability.
- Integrated OpenAI CLIP model to perform multimodal comparison between image inputs and text-based predictions.

Food Allergy and Nutritional Information App
Role: Frontend Developer
Technologies: React, CSS, HTML

- Designed and developed the application's landing page, focusing on user experience and accessibility.
- Redesigned and enhanced the sign-in and sign-up interfaces to improve usability and visual consistency.
- Implemented frontend functionalities for managing user allergy records, including adding, editing, and deleting allergy information.

CERTIFICATIONS & ACHIEVEMENTS

- TOPCIT Level 2 Passer (2025)
- Certificate of Completion – Networking Essentials (2022)
- Certificate of Completion – Intro to Packet Tracer (2022)
- Certificate of Completion – Introduction to Cybersecurity (2022)
- Certificate of Completion – Introduction to IoT (2022)

EDUCATION

Bachelor of Science in Computer Science
University of Cebu – Main | Sanciangko St., Cebu City, Cebu, Philippines | 2026
Academic Honors: Dean's Lister (5 semesters)

REMOTE WORK READINESS

Internet: Primary: Globe at Home 300mbps | Backup: Globe mobile data hotspot
Equipment: Personal laptop (Ryzen 5) | 16 GB DDR4 RAM
Availability: Flexible schedule | Available for US/UK/AU time zones | Open to graveyard shift
